Every kernel counts.

Weaver popcorn pops with greater expansion to maximize profits and minimize waste. With a high average MWVT rate, our popcorn yields are more than our competitors. And while a few unpopped kernels may not sound like a big deal, it can really add up. See the chart below to see how greater expansion is the key to expanding profits.

Weaver Gold (mwvt: 46-49)

The gold standard for concession popcorn, providing the most servings per pound of tender butterfly kernels with high yields and less breakage.

Top Cut (mwvt: 48+)

A special hybrid gourmet popping corn, with a high popping expansion.

Large Kernel (mwvt: 43-46)

Large butterfly kernels with tender eating qualities developed for less breakage in larger scale wet or dry popping operations.

Mammoth Mushroom (mwvt: 27-30)

Our premium mushroom variety consistently provides large kernels and optimal yields. Recommended for making caramel corn.

Caramel & Sweet (mwvt: 27-30)

A special mushroom variety designed especially for less breakage and uniform coverage. Recommended for making kettle corn.

Small Kernel (White) (mwvt: 43-46)

A smaller, butterfly shape kernel for use in home poppers.
