## FROZEN DRINK MACHINE INSTRUCTIONS

**\*\*IMPORTANT\*\***

Be sure equipment is connected to properly grounded 120 volt power supply with 15 amp circuit. Plug machine directly into an outlet. **If you must use an extension cord, use only #10 wire cord as short as possible. DO NOT** use machine in direct sunlight or in 80°+ weather; *it always works best inside*. Also, try not to have other items running on same electrical circuit.

USE FRUSHEEZ FROZEN DRINK MIX ONLY  
USE OF ANY OTHER PRODUCT MAY RESULT IN IMPROPER FREEZING AND  
CAUSE DAMAGE TO THE MACHINE

DO NOT CHANGE SETTINGS! THEY ARE AT THEIR OPTIMAL SETTINGS!!

### MIXING

Mix one bottle (½ gal. of concentrate) with 2 gallons of water (hint: use empty mix bottle x4) Pre-mixing will expedite freezing. Pre-cool the mixture prior to pouring into the machine. Makes approximately 40 – 8oz servings. It will take approximately 45 minutes for fluids to freeze.

**\*\*\*Adding alcohol will drastically slow the freezing process\*\*\***

We suggest that you add alcohol after you have poured the drinks. This makes for a better freeze time and avoids possibility of minors consuming alcohol

Pour the mixture into the machine's bowl, up to the maximum fill line.

**DO NOT OVERFILL!**

### OPERATION

1. Install the cover and check that it is correctly placed over the bowl.
2. Make sure the barrel (container) is correctly snapped in.
3. Set the power switch to 'I' ON position. DO NOT run machine without mix.
4. Set the mixer/ refrigeration switch to 'II' FROZEN position.  
If mixture begins to over freee, turn switch to 'I' CHILLED position.
5. Set the light switch to 'I' ON position
6. Refill bowl when it's low with pre-mixed, pre-cooled product.

### CLEANING

1. Empty any remaining contents.
2. Rinse bowl by adding clean warm water, and completely drain
3. Please DO NOT disassemble the machine, we will take care of the rest of the cleaning.
